

Thread cutting system Z16-GK-2

Design for
tapered threads

Thread cutting system for tapered threads Z16-GK-2

Weight 7 kg

	mm	inch
Working range nominal \varnothing	8–25.4	0.315– 1
Max. pitch	2	13 t.p.i.
Tapered thread length	26	1.02
Eccentric rings and chaser holders	see table for holders	

Accessories:

Toothed segments Z16-GK (set = 10 pieces)

Toothed segments ensure an interlocking connection between the guide ring and the eccentric ring, thus preventing unintentional adjustment of the machining diameter.

Toothed segments are mainly used when the cutting systems are used in a reversing manner or the tool spindles are stopped abruptly after thread cutting.

Accessories:

Setting device with dial gauge
